## **SkyBitz Launches Global Solution to Meet Customer Demands for Managing a Wide Range of Assets**

*The New GLS 100 Delivers Affordable and Versatile Tracking Technology*

**STERLING, Va. – June 11, 2008** – SkyBitz, the leading mobile asset tracking and information management service provider, today announced the availability of the GLS 100, an affordable satellite communication mobile communicator that will diversify SkyBitz’s technology portfolio and meet growing demand within its expanding international customer base.

The GLS 100 will increase SkyBitz’s range of technology offerings to meet current demand, as well as expand its customer base to include a variety of fleets in trucking, rail, marine, energy, hazardous materials, construction and heavy equipment. The small size of the GLS 100 mobile communicator makes it possible to track a wider variety of assets and the unit can be mounted both vertically and horizontally. This further enhances SkyBitz’s position as the premier source of asset management solutions. Like other SkyBitz products, the GLS 100 is easy to install and provides a host of reporting options with more than five years of battery life.

The satellite communication for the GLS 100 will be provided through Globalstar (NASDAQ:GSAT), a global provider of satellite voice and data services. The location data will be seamlessly integrated into SkyBitz’s existing customer web application InSight, an easy-to-use Web interface that puts the power in tracking and monitoring. Globalstar enables SkyBitz to provide global coverage to customers. Axonn LLC, a developer of radio frequency-based hardware, will provide the GLS 100 hardware which now meets SkyBitz’ stringent technical specifications and certification processes.

“We continue to listen to the requirements of our expanding global customer base and pair our products and technologies with their needs,” said Homaira Akbari, president and CEO, SkyBitz. “The customers we serve want asset management solutions that maximize efficiency, improve their bottom line and provide security and safety capabilities anywhere in the world. The partnership with Globalstar and Axonn allows us to provide a key solution that will meet the needs of our customers.”

“We are very pleased to announce the addition of the GLS 100 to the suite of asset tracking solutions that utilize today’s Globalstar Simplex network and we look forward to working with Skybitz now and in the future as we prepare to launch our next-generation of enhanced satellite data services,” said Jay Monroe, chairman and CEO of Globalstar, Inc. Mr. Monroe added, “With our Simplex data performance exceeding 99 percent messaging reliability and the continued expansion of our Simplex coverage, this agreement provides Skybitz with the ability to offer highly reliable asset tracking solutions to their domestic and international customers around the world.”

“SkyBitz has extensive knowledge and experience in providing asset tracking solutions and we are excited to be working with them” said Dave Biggs, Axonn’s CEO, “The SkyBitz GLS100 solution utilizes Axonn’s MMT and the Globalstar Simplex data network to provide SkyBitz’s customers access to a wider range of asset management options in an extremely compact and flexible system.”

**About SkyBitz, Inc.**

SkyBitz is the leading mobile asset management company, providing real-time information to customers in the fields of transportation, energy, construction, agriculture and waste management. SkyBitz delivers a reliable, easy-to-use mobile asset tracking and information management solution that provides clear visibility to mobile assets anytime, anywhere. The patented two-way GLS satellite communicator is compact, easy to install and provides multi-year battery life requiring the least amount of maintenance. Throughout North America and Europe, more than 500 customers currently rely on the cost-effective SkyBitz GLS technology to manage more than 150,000 assets and achieve total visibility, improve security; lower operating costs and enhances customer service. SkyBitz was named the second-fastest growing company in North America by Deloitte and was honored with the 2007 Frost & Sullivan Product Innovation Leadership Award. Headquartered in Sterling, Va., SkyBitz is a privately held company financially backed by CIBC Capital Partners, AIG Highstar Capital, Inverness Graham Investments, Motorola Ventures and ITV, a fund of Cordova Ventures.
